
TWS Logistics, your express logistics partner for regular and ad-hoc shipments to the Nordics

We have a daily fleet of express vehicles departing Benelux late afternoon for arrival next morning in the Nordics. This service is a good complement to traditional overnight air express services, which is negatively affected by Covid-19. Industries covered are healthcare, technology, automotive, as well as consumer & retail.

All vehicles in the TWS Logistics fleet are branded and tracked by GPS. We offer a wide selection of additional services, such as DG (dangerous goods), HRHV (high risk/high value), carry-in, un-packing, temperature control and insurance.

If you have shipments requiring special conditions, please submit your inquiry to our operations department. All TWS Logistics drivers are uniformed, trained and carry PDA's.
